When checkout cell is clicked, a reason code list will appear.

If one of the following check out reason codes 02, 10, 15, 26, 32, 34, 35 or 36 are selected during a student check out action then the health code selection window will appear.

When a health condition is selected then select the severity. (MI- mild, MO- moderate, SE- severe.)

When flu like symptoms are selected, JPAMS will e-mail nurses and staff as soon as posting occurs using contact data from Human Resources and object function coding from DOE tables. Nursing staff will provide instructions to obtain blood tests, swabs, etc. to determine if the student has contracted swine influenza and notify proper authorities if test are positive.
