

# Meeting the Unforeseen Made Easier than Finding Needles in a Hayloft

**Jan Anyan**  
Technology Specialist  
Winn Parish School Board.

Dear jpams STAFF,

I want to let you know how much we appreciate the work your staff did to help adding and dropping disaster student data. The ability to move disaster student information directly into our student system saved our district many hours, provided accurate data and immediate transmission to DOE in their formats.

This has been a challenging year for SIS coordinators throughout the state. The quick modifications made to your software and your coordination for state data management needs have been invaluable to our district. Please continue to coordinate your efforts with DOE. I know that integrity of our data will be strengthened through this effort.

Sincerely,

Jan Anyan  
Technology Specialist

## Student Information “Awesome”

Dear JPAMS Team,

As a “newbie” from another software system, I cannot tell you how good the SIS correction module is to work with. This tool is remarkable and makes SIS correcting a breeze. I am blown away with how good it is to have all of the records needed to fix a SIS problem located in one easy place to review and edit.

Our previous vendor required work with reports that would put the data elements in one place for review, then remote out to schools to make corrections, then have them uploaded and processed into the database, hoping they were correct.

***The JPAMS SIS tools are just awesome!***

Thanks very much for your innovation and ideas in software development.

Jessie Joubert, Technology Director  
Acadia Parish School Board
